## ABOUT ME

I'm a software engineer with a strong focus on Mern stack development. Through my work at several projects and companies I have built scalable frontend applications, Backend applications, maintained databases and built business-logic from scratch.

## EDUCATION

University of Management & Technology (UMT)  
Bachelors of Science in Software Engineering  
2021-2025

## SKILLS

Backend:

Node.js, Express.js, Firebase, Firebase Auth, Railway, Vercel, OAuth, REST, MongoDB, CRUD operations

Frontend:

Javascript/Typescript, Node.js, Next.js, Axios, Tailwind, GitHub, Responsive Design

## LANGUAGES

- English (Fluent )
- Urdu (Native)
- German (Basic)

## WORK EXPERIENCE

### DMZ Dev Hub - React-Js Developer 2024- (03-months )

At DMZ I worked on web projects using JavaScript, TypeScript, and React.js. I built and updated user interfaces, connected APIs, fixed bugs, and styled components with Tailwind CSS. I also used Git to collaborate with the team and manage code changes.

### Face Derma AI – MERN (2024, ( 1 Year)

#### Final Year Project

Face Derma AI is a healthcare technology project aimed at making dermatological care more accessible through AI. It allows users to upload images of skin issues and instantly receive AI-driven diagnostic insights. The platform features a user-friendly interface, dermatologist profiles, location-based assistance, detailed skin reports, a smart chatbot, and even product recommendations bridging the gap between users and timely, affordable skin care.

### Freelance & Side Projects – MERN-stack Developer (2024- Current)

During the last 2 years I've been participating in many small projects where I used tools and languages like Javascript, and typescript to build, maintain and test applications for start-up companies like **"Active technology"** (Solar Company), **"School Record Inventory"** (School), **"Ru-Noval"** (web novels and fan fictions).
